

GITHUB USING GUI

Part 1 – Create a Git repository

Step 1 – Either you can directly click new repo on top right ‘+’ symbol or we can go to Repositories section and click on “New”.

Step 2 – Fill the required details on the page, generally name and description are enough.

Search or jump to... Pull requests Issues Marketplace Explore

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner: FunBook5 / Repository name: My new repo ✓

Great repository names are: Your new repository will be created as **My-new-repo**. about [studious-giggle?](#)

Description (optional): I am creating a new repo for fun

☒ Public
Anyone on the internet can see this repository. You choose who can commit.

☐ Private
You choose who can see and commit to this repository.

Initialize this repository with:
Skip this step if you're importing an existing repository.

☒ Add a README file
This is where you can write a long description for your project. [Learn more.](#)

Add .gitignore
Choose which files not to track from a list of templates. [Learn more.](#)
.gitignore template: None
