

## Part 2 – Commit a file to your repository

### Step 1 – Go to add file option.

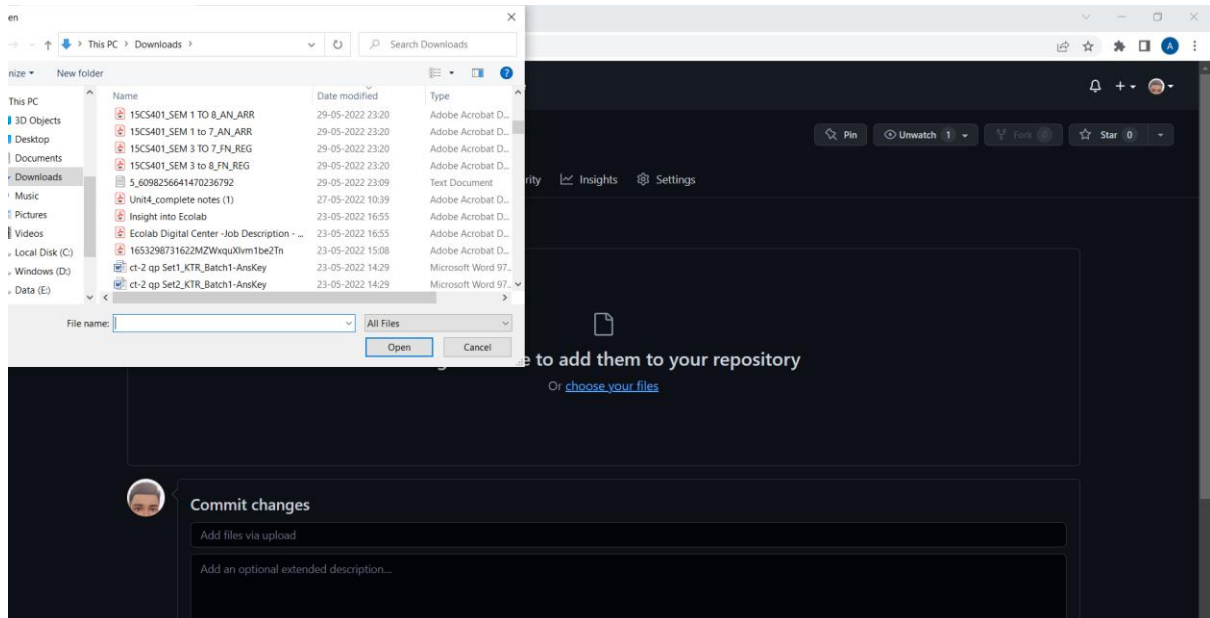

### Step 2 – Click on upload files if you want to upload from the computer or new file if you want to start from scratch.

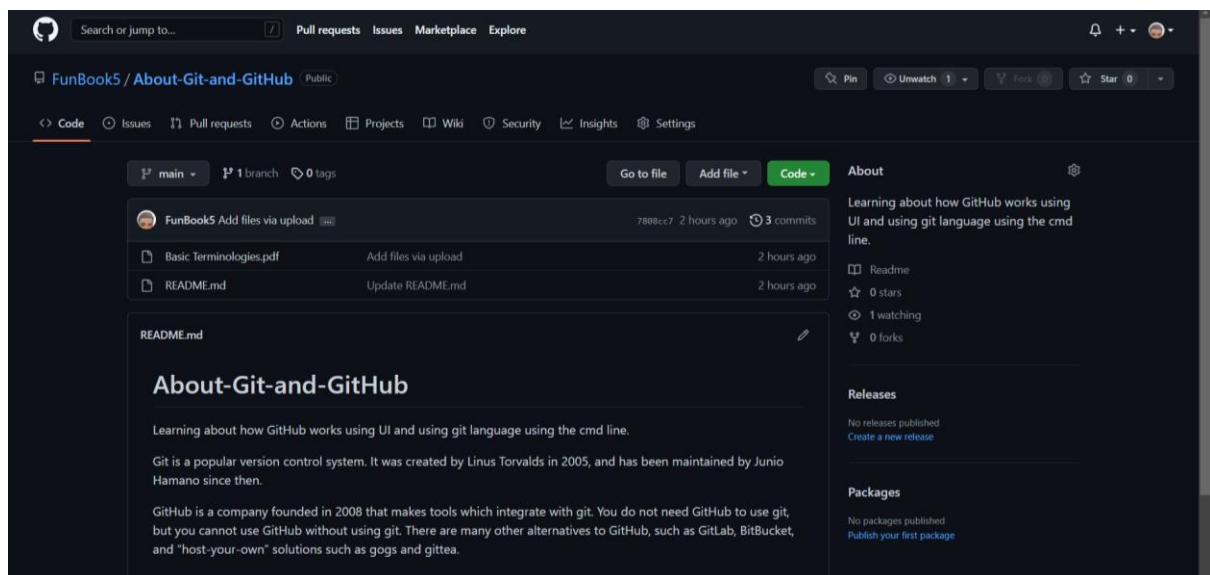

**Step 3 – Select the files you want to upload using the choose the files option or drag the file using cursor**

**\*\*If you want to upload the whole folder dragging is a better option.**

**Step 4 – Verify that the right file is uploaded.**

**\*\*There might be some change in the order if you upload multiple files therefore you can either use cmd line or upload files one by one.**
